Before Placing your Order

Please note that not all models may be ordered in all locations. The OICT and DFS approved models may differ.

Ernest Grimes is the Inside Sales Representative for the UN account and is the primary contact for assistance with placing orders and obtaining order status. His contact information can be found on Page 4 of the Catalog. Please note the Purchasing Group and Purchase Order number should be mentioned on all correspondence. Quotations may be requested from Ernest Grimes at any time.

How to Order: OICT Supported Equipment for UNHQ-NY
All requirements for equipment shall be requested to the Procurement Division through Requisitions.
All Purchase Orders shall be sent via email to leorders@lenovo.com and egrimes@lenovo.com

How to Order: DFS Supported Equipment for Peacekeeping and Political Missions
All Purchase Orders shall be raised against Umoja Contract 4700000261 and sent via email to leorders@lenovo.com and egrimes@lenovo.com

After submitting an order, you should receive an acknowledgement of the order from Lenovo within 5 business days and an estimated shipping date. Please note the Service Level Objective with respect to delivery may be found in the Country Table listed on Page 5 of the Catalog.
If you do not get an acknowledgement of the order from Lenovo within 4-5 business days - please follow up with a request on the status of the order.

Information to be included on a Purchase Order
Purchase Order Number

Terms & Conditions: The Purchase Order shall indicate that it is being issued under the terms and conditions of the Direct Purchase Agreement PD/C0260/04 Amendment 14.
This agreement was signed between IBM and the UN on December, 20, 2004 and has now been assigned to Lenovo.

Ship To Address: For orders shipped to NY, only the UN ship to address in NY must be listed on the PO. For DPKO mission orders, the UN NY address listed below AND the mission address must **both** be included on the PO.   The NY address should reference that it is the ship point of record and that a freight forwarding arrangement has been secured with Lenovo Global Logistics to ship the product to the mission locations.
Ship Point of Record (NY, NY):
United Nations Receiving Area
48th Street & 1st Avenue
New York, NY 10017

Bill To Address: The Bill to Address on the Purchase Order MUST be to an address in New York. IMPORTANT NOTE FOR MISSIONS: Lenovo will NO LONGER send invoices overseas. For orders placed by the Missions, an address in New York, NY to which Lenovo will send the invoice MUST be provided (the missions PO Box in New York is acceptable). Mission orders without a NY Bill to address will not be considered to be officially accepted by Lenovo.

Tax Status

Part numbers: The part number must be a valid and recognizable Lenovo part number for the country that is placing the PO.

Quantity for each part number.

Price: The unit price for each part number and the total amount of the PO shall be in USD.

Customer Requested Arrival Date

Special Instructions
Notes: 1) Shipping: DAP incoterms 2010 applies for all locations outside of the US, therefore the UN is responsible for customs clearance fees.
2) Payment required to Lenovo's designated bank in the US with payment in USD.

How to Place an Order (Offices Away from Headquarters):
All other UN Offices and Agencies should contact Ernest Grimes (egrimes@lenovo.com). In order to set up a new location, some additional information will be required in order to allow Lenovo to better understand the UN OAH requirements. Specific information required includes the following:
- Configurations (Desktop and/or Laptop)
- OS/Keyboard Language Requirement
- Line Cord Requirement
- Ship to and Bill to Address
- Contract Acceptance Transaction Document (ATD) may be required in some countries.

Q: What is Absolute Software?

A: Absolute® Software is the industry standard for persistent endpoint security, tracking and management solutions for Lenovo ThinkPad computers, ultra portable devices and the data they contain. Patented Absolute persistence technology is built into all current Lenovo ThinkPad devices to provide you with a trusted lifeline to each device in your deployment, regardless of user or location.

Absolute DDS provides a full complement of features and remote capabilities so that you can control and secure corporate data and devices, maintain the trust of your customers and stakeholders, and protect your organization from financial penalties and reputational damage.

Absolute Data & Device Security (DDS) Asset Administration Data & Device Security Geotechnology	Lenovo Device	Term	Lenovo Part #	MSRP/license
	For Mobile Devices MORE than $500	4 Years	4L40K61562	$55

REPORTING & ANALYTICS

Collect incredibly accurate information from each device, including historical data. Determine what's installed on a device. Identify events and activities that could be precursors to a security incident including changes to IP address, location, and user; non-compliant software/ hardware installations; and many more. Receive a notification if these activities occur.

GEOTECHNOLOGY

Track assets on a Google Map™, including recent and historical locations. Create geofences based on corporate policies. Investigate devices that are out of bounds or entering an unauthorized location.

RISK ASSESSMENT

Identify risk conditions and receive a notification if these conditions occur. Key security data integrates automatically with SIEM solutions. Validate the status of complementary security applications such as encryption, anti-malware, and SCCM. Use these reports to prove to auditors that security measures were properly implemented and in place at the time of a security incident.

Absolute DDS can help you assess risk and apply adaptive security measures based on each scenario:

- *Secure endpoints throughout their lifecycle*
- *Set alerts to be notified about possible threats*
- *Take action to quickly identify and remediate endpoint security incidents*

RISK RESPONSE

Remotely recover or delete data. Set policies to ensure offline devices are automatically protected. Freeze a device and communicate with the user to verify status. Produce an audit log to prove data on a compromised device was properly secured, not accessed, and safely deleted. Use certified data delete workflows to decommission a device.

ENDPOINT INVESTIGATIONS

Leverage the Absolute Investigations team to determine the cause of an endpoint security incident. Identify and eliminate insider threats. Refine best practices so the same incident does not reoccur. Determine if data was accessed during an incident, and whether or not a data breach notification is required. Recover stolen devices.

PERSISTENCE TECHNOLOGY

Absolute DDS relies on patented Persistence® technology by Absolute. Persistence is embedded into the core of most computers, tablets, and smartphones at the factory. Once activated, it provides you with a reliable two-way connection so you can confidently manage mobility, investigate potential threats, and take action if a security incident occurs.

Persistence is built to detect when the Absolute DDS software agent has been removed. If the agent is missing, Persistence will ensure it automatically reinstalls even if the firmware is flashed, the device is re-imaged, the hard drive is replaced, or if a tablet or smartphone is wiped clean to factory settings. No other technology can do this.

*Warranty Service is not available in all of the UN Mission countries. However, warranty service is available under Lenovo's International Warranty Service (IWS) offering. IWS is available during the warranty period to customers who travel or relocate to countries where their computer is sold and serviced by Lenovo or Lenovo resellers authorized to perform warranty service. Eligible Lenovo computers are identified by their four-digit machine type.

You can obtain IWS through the method of service, such as CRU, depot, carry-in, or on-site, provided in the servicing country. Service methods and procedures vary by country, and some service or parts may not be available in all countries. Service centers in certain countries may not be able to service all models of a particular machine type. In addition, some countries may have fees and restrictions that apply at the time of service.
